

Santrax[®] Payer Management

Electronic Visit Verification[™] Solutions

*Increasing the Capacity to Care
Improving the Process of Home Care*

Sandata is uniquely positioned at the center of the home care network. Our solutions maximize the value of every in-home encounter by ensuring proper care delivery.

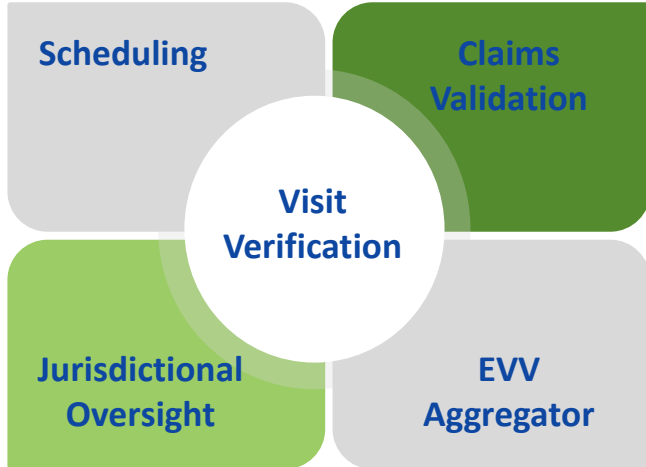

We increase provider efficiency and effectiveness, and integrate payers and providers to drive network transparency. The result is decreased cost, improved care monitoring, stronger provider networks, and greater participant satisfaction. Sandata's EVV Solution:

- Improves HCBS quality oversight with real time dashboards and reporting;
- Ensures providers are delivering and participants are receiving authorized services with real time alerts;
- Reduces Fraud, Waste and Abuse by only allowing claims to be submitted that meet all program validation requirements, including verified visit data.

EVV qualifies for Enhanced Federal Match

- 90% Implementation
- 75% Program Fees

Santrax Payer Management Overview

Electronic Visit Verification

Sandata's modular solution allows the payer to select the right features and functionality to support your network. Deployment includes data integration with participant eligibility, provider data, and electronic submittal of 837 claims.

Visit Verification

Assured Coverage™ provides multiple verification methods including telephony, mobile visit verification (GPS), and device options. Additional features include voice biometrics, member signature, and non-clinical survey questions to maximize the value of each visit.

Scheduling

Scheduling ensures providers accurately follow the authorization, and provides real time alerts for late or missed visits.

Claims Validation

Claims validation ensures only claims with properly verified visits are submitted for payment, reducing fraud and abuse. By eliminating pay and chase, savings are generated at go live.

Jurisdictional Oversight

Dashboards, alerts and reporting help the payer manage provider compliance and ensure care delivery.

EVV Aggregator

EVV Aggregator is a repository for all EVV data, allowing providers to use their current EVV vendor while giving payers a uniform set of network rules, data and reporting.
