

Sandata EVV

21st Century Cures Compliant

A Comprehensive EVV Solution for Payers

Sandata is a national leader providing statewide payer Electronic Visit Verification (“EVV”) programs. Our solutions are deployed in thirteen (13) states, serving State Medicaid Agencies as well as eight (8) Medicaid MCOs with a total of 3,500+ providers and 1.8M participants. Sandata has been providing payer EVV solutions for over 12 years and EVV solutions for providers for 40 years.

Sandata EVV is a modular solution that allows the payer to select the right features and functionality to meeting your unique EVV needs.

Sandata EVV increases provider network efficiency and effectiveness, and integrates payers and providers to drive network transparency. The result is improved care monitoring, stronger provider networks, improved claims payment, and greater participant satisfaction.

Sandata’s EVV Solution:

- Improves HCBS quality oversight with real time dashboards and reporting;
- Ensures providers are delivering and participants are receiving authorized services with real time alerts;
- Reduces Fraud, Waste and Abuse by only allowing claims to be submitted that meet all program validation requirements, including verified visit data.

EVV qualifies for Enhanced Federal Match

- **90% Implementation**
- **75% Program Fees**

Sandata EVV Overview

With Sandata, you are partnering with a home care thought leader with 40 years of experience operating EVV programs nationally. Our solutions create a “connected home health network” which maximizes the effectiveness of the Medicaid program; maximizes the efficiency of home care providers by reducing manual paperwork; ensures 21st Century Cures Compliance; and improves service delivery and reduces fraud by providing oversight and reporting.

Sandata Aggregator and Jurisdictional View/Business Intelligence

Quality Oversight and Management**

Santrax EVV Portal

Data Integration

Deployment includes integration with:

- Member File;
- Authorization File;
- Provider File;
- Direct Care Worker File.

Scheduling

Scheduling ensures providers accurately follow the authorization, and provides real time alerts for late or missed visits.

Visit Verification

Assured Coverage™ provides multiple verification methods including telephony and mobile visit verification (GPS). Additional features include member signature, and non-clinical survey questions.

Claims Options

MMIS Claims Validation

- Leverages existing MMIS adjudication process;
- Less change for the provider community;
- Ensures only claims with validated EVV data are paid.

Sandata Billing

- 837 format per Georgia DCH requirements

Aggregator Third Party EVV Integration

- Providers have the option to use and self-fund their own EVV solution
- EVV data is normalized across all vendors

Consumer Directed Care Suite

- Portal that allow Members, Caregivers, and/or Fiscal Agents to review and approve EVV Data.
- Supports Data Extracts for payroll.
