

Sandata EVV

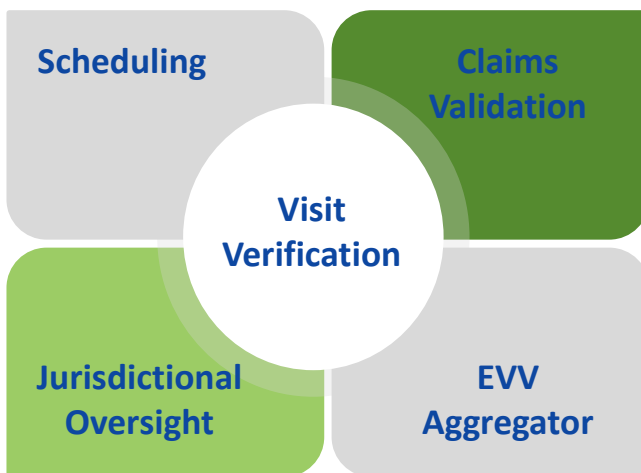

21st Century Cures Compliant

A Comprehensive EVV Solution for Payers

Sandata is a national leader providing statewide payer Electronic Visit Verification (“EVV”) programs. Our solutions are deployed in fourteen (14) states, serving State Medicaid Agencies as well as Medicaid MCOs. Sandata has been providing payer EVV solutions for over 14 years and EVV solutions for providers for 40 years.

Sandata EVV is a modular solution that allows the payer to select the right features and functionality to meeting your unique EVV needs.

Sandata EVV increases provider network efficiency and effectiveness, and integrates payers and providers to drive network transparency. The result is improved care monitoring, stronger provider networks, improved claims payment, and greater participant satisfaction.

Sandata’s EVV Solution:

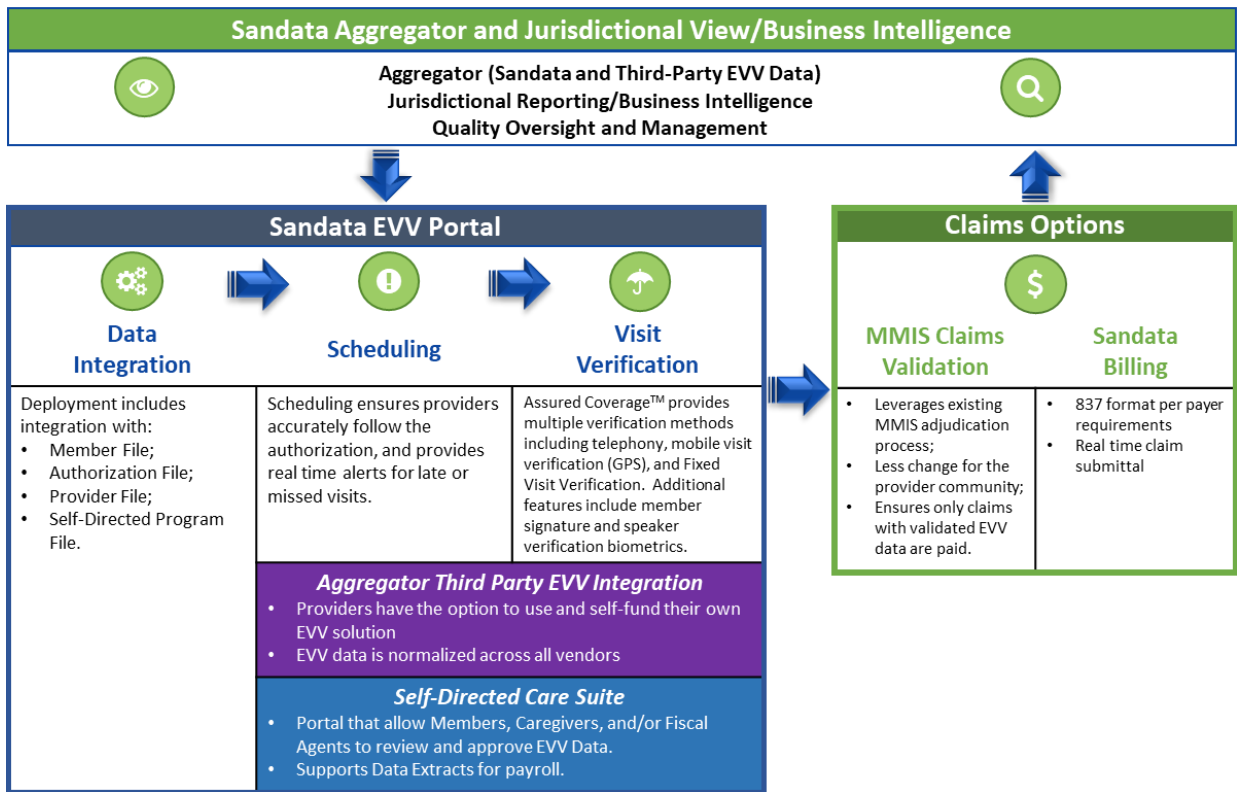

- Improves HCBS quality oversight with real time dashboards and reporting;
- Ensures providers are delivering and participants are receiving authorized services with real time alerts;
- Reduces Fraud, Waste and Abuse by only allowing claims to be submitted that meet all program validation requirements, including verified visit data.

EVV qualifies for Enhanced Federal Match

- **90% Implementation**
- **75% Program Fees**

Sandata EVV Overview

With Sandata, you are partnering with a home care thought leader with 40 years of experience operating EVV programs nationally. Our solutions create a “connected home health network” which maximizes the effectiveness of the Medicaid program; maximizes the efficiency of home care providers by reducing manual paperwork; ensures 21st Century Cures Compliance; and improves service delivery and reduces fraud by providing oversight and reporting.
